# Joomla! 4

A New World of Possibilities

Build a beautiful, scalable website that will grow with your business

In today's world, a website represents your business. It is the front door to the outside world, where customers enter to understand what you do and provide. Your website needs to adapt and stay on top of the ever-changing technology that drives this modern world.

Joomla is a versatile and powerful content management system with built-in functionalities, which will allow you to build a website that will adapt and change as your business grows.

What is Joomla?

Joomla is an award-winning Open Source CMS built and maintained by a strong community of volunteers, who strive to produce robust, secure, easy to use software. It is free to download and use, and its functionalities meet cutting edge web technology.

Joomla enables website creators to create powerful websites, where maintaining its content is easy and seamless.

Why Joomla?

Joomla can be used to build many types of websites. Community-based websites, e-commerce or e-learning websites, Joomla can adapt to the structure or purpose of the website you have in mind.

Joomla has an extensive array of features:

WEB SERVICES

CONTENT WORKFLOW

**MULTILINGUAL**

CLI

CUSTOM FIELDS

MEDIA MANAGER & IMAGE EDITING

EMAIL TEMPLATING

FAST AND EASY TO INSTALL

ROBUST CODEBASE

ACCESSIBILITY

ACL (ACCESS CONTROL)

SECURITY

Many advanced features included

Custom fields

Use the flexible custom fields feature to add extra information to your pages in a structured way.

Workflow

Joomla's workflow feature allows you to edit and approve content before it's published. A feature that can prove very handy for large content with multiple editors, where content can go through various stages of approval before going live. This feature can notify teams through email when they need to step in for their part in the workflow.

User registration

Do you need users to be able to register on your website? Joomla has built-in features that will allow you to manage user data and subscriptions.

Within Joomla, users can view, manage, and, if needed, remove their privacy-sensitive data, compatible with GDPR requirements.
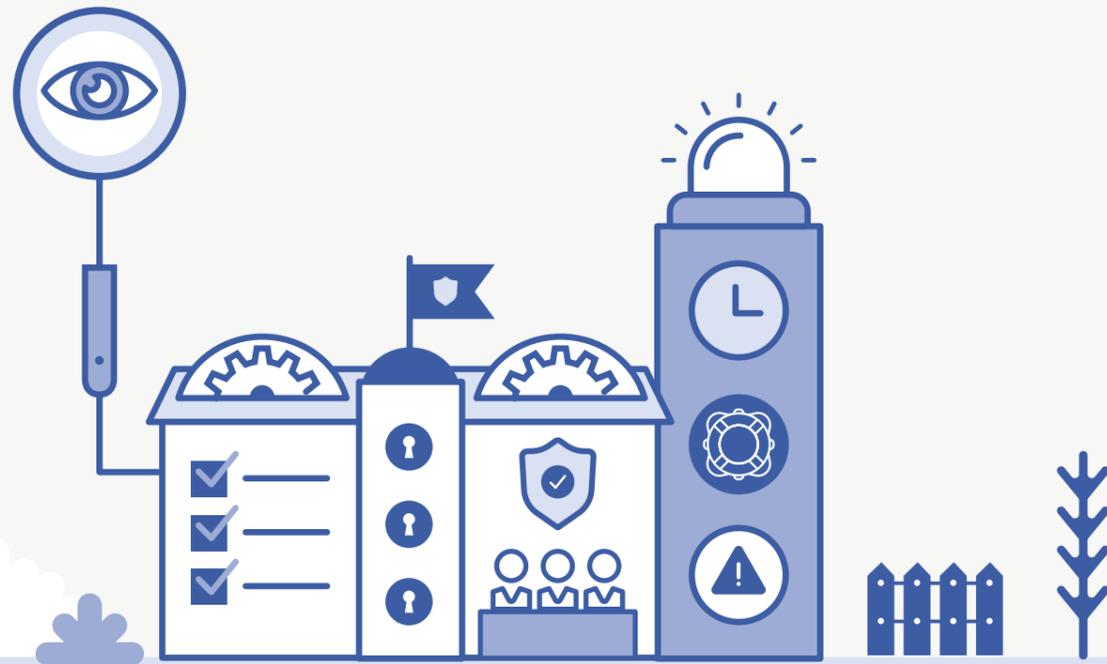

Adapt to the digital world

Joomla makes it easy to manage your website.

Do you want the power of the internet at your fingers? Joomla is packed with a vast array of possibilities.

Are you planning to build a website that is larger and more powerful than average? Joomla gives you many possibilities out of the box.

Joomla's core provides many powerful features to build a website that suits most of your needs.

Do you have specific needs? Don't worry, you'll find thousands of extensions on the official Joomla Extensions Directory.

Connect to external systems

Joomla's web services platform is flexible and easy to manage, yet extremely powerful to integrate the data needed for the growth of your business.

Extras

Out of the box is an extremely powerful and flexible CMS. If you are looking for more functionalities have a look at the several thousands of extensions on our Extensions Directory:

- Image galleries
- E-commerce
- Complex forms
- Social media integration
- SEO-tools
- Newsletters
- Guestbooks
- Booking systems
- Slideshows
- Thousands of different designs (templates)
- Many more

Security matters

Joomla has proven to be one of the safest CMSs available and its security standards are extremely high. Strong passwords and built-in two-factor authentication as well as WebAuthn, ensure that only you have access to your website.

Search engine optimization

Amongst many other SEO features, Joomla's built-in redirect tool allows you to point visitors at the new page location if you move it, or at a replacement, if you have deleted a page. This avoids error messages that can result in damage to your search ranking.

Speed matters

Joomla's performance has been top-ranked and it can be further enhanced with its built-in caching technology and Gzip compression, making it one of the fastest loading CMSs.

Mobile friendly

Joomla is 100% mobile friendly on both the frontend (what the visitor sees) and the backend (your control panel). Your website looks good on all devices: desktops, tablets and mobile phones.
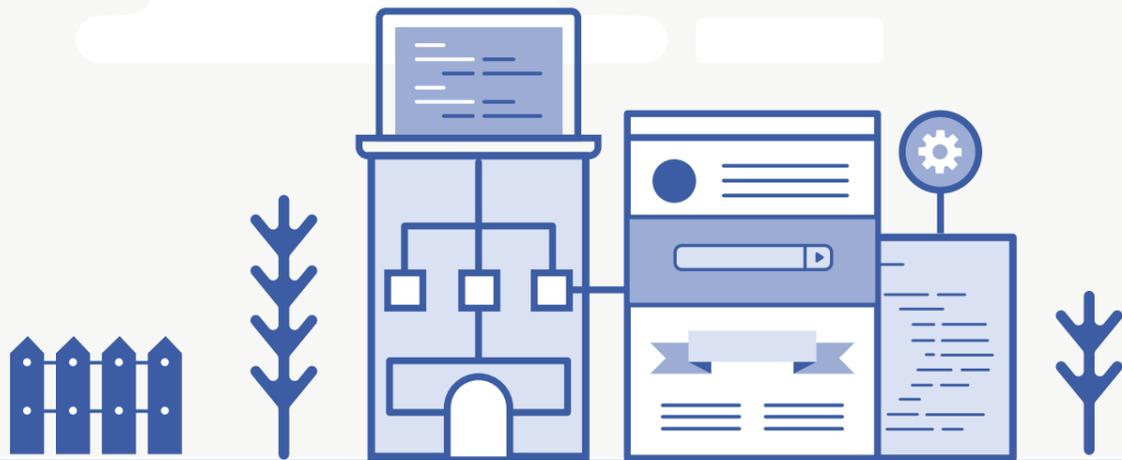

Joomla is free to use, free to download, and free to upgrade.

Are you ready for a universe of possibilities?
